DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over AF 300 from Nufarm MSDS, Infosafe No. NU003. AF 300 MSDS teaches a composition comprising 2,4-dichlorophenoxy acetic acid, ethoxylated alcohol, plus solvent 400 (kerosene). See MSDS. AF 300 MSDS does not teach or suggest the instant amounts of ingredients. It would have been obvious to one having ordinary skill in the art to determine the optimum amount of ingredients. One would have been motivated to do this in order to develop the most effective herbicide composition.

Double Patenting Rejection

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 1 is provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of copending Application No. 09/916,611. Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 1 of instant application has a broad scope and encompasses claim 1 of Application No. '611. Note that instant application is to acid herbicides whereas Application No. '611 is to a chlorinated carboxylic acid herbicide, which is a species in the acid herbicide genus.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
